ABOUT ME

Junior fullstack developer completing a Frontend Developer program at Futurgame, Stockholm (September 2025 – May 2027). After my B.Tech, I took an extended career break to focus on raising my two children, and returned to education in 2024 to build a new career in software. Since then I have trained across the stack — HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Node.js/Express and databases — and completed a client-based group project as part of my coursework using Agile methodology. I am currently deepening my database skills with Supabase and looking for a LIA (workplace-based learning) placement from January to May 2027 to gain hands-on industry experience.

PROJECT

Client-Based Group Project — Futurgame Coursework, Stockholm

May – June 2026

- Worked in a small team to build and deliver a web application against a real client's requirements, from planning through to handover.
- Contributed to frontend features (HTML, CSS, JavaScript, React) and backend logic/APIs (Node.js/Express), and took part in testing before delivery.

EDUCATION

Futurgame — Frontend Developer Course, Stockholm

September 2025 – May 2027 (in progress)

- Currently studying database design and development using Supabase.
- Seeking a LIA (workplace-based learning) placement from January to May 2027 as part of the course.

Sundsgårdens Folkhögskola, Helsingborg

January 2025 – June 2025

Backend Developer track — server-side JavaScript, APIs, and databases.

Sundsgårdens Folkhögskola, Helsingborg

August 2024 – January 2025

Frontend Developer track — HTML, CSS, JavaScript and React.

JNTU, Anantapur

June 2009 – May 2013

Bachelor of Technology | Electronics and Communication Engineering.
